projects

pittsburgh parks conservancy | swift
Worked in a team of five to help nonprofit
integrate technology into the new Frick Environmental Center. Delivered an application that
engaged and educated users on sustainability
and best practices with further design recommendations going forwards. Employed HCI
concepts of user testing, contextual inquiry, etc.

zero waste pittsburgh | ruby on rails
Worked in a team of three to help nonprofit
integrate technology into current workflow.
Created an application to enhance the initial
waste audit process. Reduced turnaround time
and wasted energy on service.

experience

zazzle | user interface engineer
Contributed in design discussions of product
pages, etc. Aided in the user experience design
of design tool for special product pages. Gained
experience in frameworks such as .Net, Uize,
etc. Primarily worked in Javascript and C#.

roaring fork llc | frontend developer lead
Worked remotely as a full-stack engineer with
a focus on front-end technologies. Took lead
in design and development of first iteration
of the application, bringing initial idea into a
mobile-first beta. Gained experience with many
technologies and frameworks such as angular.
js, angular material, cordova, ruby on rails etc.
Primarily worked in Javascript and Ruby.

mashwork | intern
Worked remotely as a full-stack engineer with a
focus on front-end technologies. Helped implement features through sprints. Gained experience with many frameworks such as angular.js,
node.js, express, jade, etc. Primarily worked in
Javascript.

drawbridge | intern
Worked as a front-end software engineer on a
team of three. Helped with a variety of projects,
developing components for internal and client-facing tools. Gained experience in a variety
of different technologies in PHP, Javascript,
Java, etc.
